

IRSG's Road Forward On Sustainable Natural Rubber Voluntary Initiative

SNR Initiative: Development Process and State of Progress

SNR Criteria/Indicators

SNR Criteria and Indicators:

Criteria 1: Support improvement of productivity

Performance indicator 1.1: Optimizing the planting of recommended clones

Performance indicator 1.2: Optimizing planting density

Performance indicator 1.3: Optimizing fertilizers and chemical use

Criteria 2: Enhance Natural Rubber quality

Performance indicator 2.1: Commitment to natural rubber quality

Performance indicator 2.2: Compliance with testing and grading

Criteria 3: Support forest sustainability

Performance indicator 3.1: Compliance with legal requirements

Performance indicator 3.2: Protection/conservation of protected areas

Criteria 4: Water management

Performance indicator 4.1: Compliance with legal requirements and customary use rights

Performance indicator 4.2: Treatment of industrial waste water

Criteria 5: Respect human and labour rights

Performance indicator 5.1: No Child labour

Performance indicator 5.2: No Forced labour

Performance indicator 5.3: Freedom of association and collective bargaining

SNR Initiative's Governance

Governing Entity:

- IRSG

Role of Governing Entity:

- Publication of SNR Criteria and Indicators
- Promotion of the SNR Initiative (SNR-i)
- Collection of information
- Publication of SNR-i yearly implementation report
- Organise periodic review process

Periodic review process based on:

- Input from the Governing Entity
- Implementation report
- Consultation with relevant stakeholders

SNR Initiative: Medium-term Roadmap
